Farhan Faiq Renardi

Results-driven Data Analyst with internship experience at Telkom Indonesia and Semen Indonesia Group. Skilled in Python, SQL, and Power BI for building automated data pipelines, dashboards, and predictive models across telecom and manufacturing domains.

EDUCATION

Diponegoro University September 2021 - September 2025
Industrial Engineering

PROFESSIONAL EXPERIENCE

[Intern] Data Scientist at Telkom Indonesia November 2025 – May 2026

- Cleaned and processed more than 1600 HR data entries using Python (Pandas), achieving >90% data integrity across multiple source systems.
- Optimized an employee-role matching model (Logistic Regression) to support data-driven recruitment decisions.
- Built automated web scraping pipelines using Playwright and BeautifulSoup, eliminating manual data collection across 770 sources and saving an estimated 100+ hours of manual effort.
- Conducted Exploratory Data Analysis (EDA) on workforce datasets and translated findings into structured business reports for HR stakeholders.

[Intern] Data Analyst at Semen Indonesia Group December 2023 – February 2024

- Developed 2 interactive Power BI dashboards (Sourcing Monitoring and Weekly Price Monitoring) to track margin trends and promotional impacts across 45 regional markets, directly used by the Pricing & Margin Management Department.
- Analyzed operational and financial data using Python (Pandas) and Excel, generating weekly profitability insights that informed pricing strategy adjustments.
- Reduced weekly reporting preparation time by automating data aggregation and visualization workflows through Power BI.

PROJECTS

Worka – Automated Job Mapping & Scraping Platform (Self-Project)
Built an end-to-end data pipeline system to scrape, classify, and analyze tech job postings from 5 major Indonesian job portals.

- Developed a multi-source web scraper using Python (Playwright) with Chrome DevTools Protocol (CDP) fallback to bypass logins and captchas.
- Integrated OpenAI and Tavily APIs to automatically classify job roles, company types, and extract salary estimations.
- Built a full-stack application with a FastAPI backend and PostgreSQL database to store, manage, and export mapping results.
- Designed an interactive dashboard to visualize job market proportions, top hiring companies, and prospect leaderboards.

Medical Image Classification using Deep Learning (Collaborative)
Developed a deep learning image classification model to predict male pattern baldness using transfer learning.

- Implemented transfer learning using pre-trained EfficientNetB3 architecture, achieving 88% test accuracy on male pattern baldness classification.
- Performed image preprocessing, augmentation, and dataset balancing.
- Fine-tuned model layers to optimize classification performance.
- Evaluated performance using accuracy, precision-recall, and confusion matrix analysis.
- Structured reproducible training pipeline for scalability and future feature expansion.
- App Demo: huggingface.co/spaces/hunsolooo/Male_Pattern_Baldness

Logistics Information System for CV Qirana Furniture (Capstone Project)
Web-based logistics management system to streamline material request, stock tracking, and reporting processes.

- Identified operational inefficiencies in manual stock tracking and reporting through requirements analysis with business stakeholders.
- Built a data-driven system for material request management, real-time inventory tracking, and automated reporting using Python (Django) + SQLite.
- Improved reporting efficiency and enabled real-time stock visibility for logistics operations.
- Validated system reliability through Black-Box Testing (100% pass rate).

ORGANIZATIONAL EXPERIENCE

[University Organization] Project Manager of Industrial Engineering Orientation Program August 2021 – September 2021

- Led a 190-member team to organize a department-wide freshmen orientation and engagement program.
- Oversaw project planning, task delegation, and coordination across multiple divisions.
- Strengthened teamwork and communication among Industrial Engineering students.

CERTIFICATION

Professional Development Program "Project Risk Management" Series
Issued by Indonesia Risk Management Professional Association (IRMAPA)

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Python (Pandas, NumPy, Matplotlib), SQL (MySQL, PostgreSQL), Power BI, Tableau, Looker Studio, Excel
- **Machine Learning:** scikit-learn, TensorFlow, Keras, EDA, Predictive Modeling
- **Automation & Scraping:** Playwright, BeautifulSoup, n8n
- **Development & Tools:** FastAPI, Django, JavaScript, SQLite, Git/GitHub, Figma
